INSTRUCTIONS

A) Insert E-Shoes into your footwear when not in use.

B) If the shoes will later be placed in a shoe bag, do not completely close it.

TECHNICAL NOTES

Given the different levels of perspiration in each individual, which determine the intensity of unpleasant odors, we recommend the following:

1) For shoes that have been worn for a long time, we recommend leaving E-Shoes in the shoe for at least 48 hours.

2) For new shoes or shoes used sporadically as training shoes, we recommend a period ranging from 2 to 8 hours.

DURATION OF ANTIBACTERIAL ACTION

10 years

CERTIFICAZIONI

ESI Antimicrobial System è stata certificata da:

UNIMORE
UNIVERSITÀ DEGLI STUDI DI MODENA E REGGIO EMILIA

UNIMORE

UNIGE
UNIVERSITÀ DI GENOVA

Università di Genova

ACCREDIA
L'ENTE ITALIANO DI ACCREDITAMENTO

ilac

Product by paolini S.p.a.
for Brain for Device

COMPANY PHILOSOPHY AND PRODUCT PROPERTIES

Brain For Device's business projects stem from the growing and shared concern for personal care and hygiene. E-Shoes made with ESI Antimicrobial System technology , is an accessory designed for sanitizing footwear through the permanent action of silver ions. The **antibacterial, antiviral, and antifungal** properties ensure consistent hygiene and health.

The sanitizing action eliminates bacterial colonies present in the footwear and inhibits any bad odors caused by physiological human sweating.
